

F805AT-FB

F805AT APPLICATION SERIES FORMULA BATCH INDICATOR

A weighing indicator developed for formula batch weighing. A maximum of 200 types of formula and 100 types of raw materials can be pre-registered and automatic weighing can be performed by switching over from feeding and discharging.

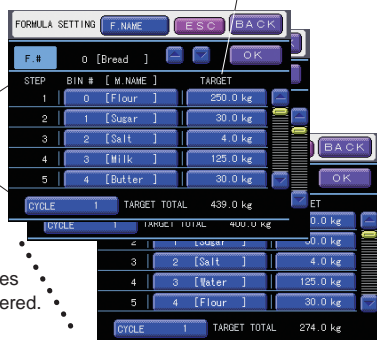

Formula table and raw material table

Setting of Formula Table and Raw Material Table can be easily done using touch screen panel.

● Formula Table

Raw Material Max. 30 types can be registered in one formula

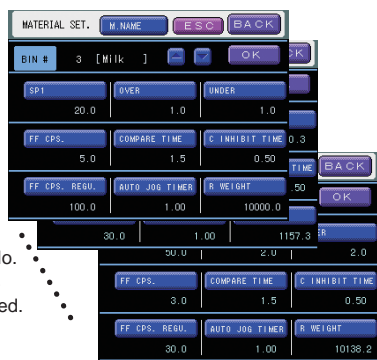

Formula No. Max. 200 types can be registered.

Each material target can be separately entered.

● Raw Material Table

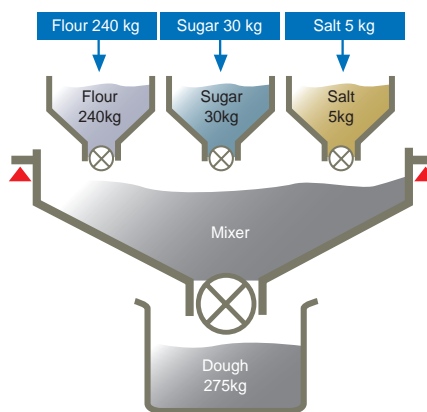

Raw Material No. Max. 100 types can be registered.

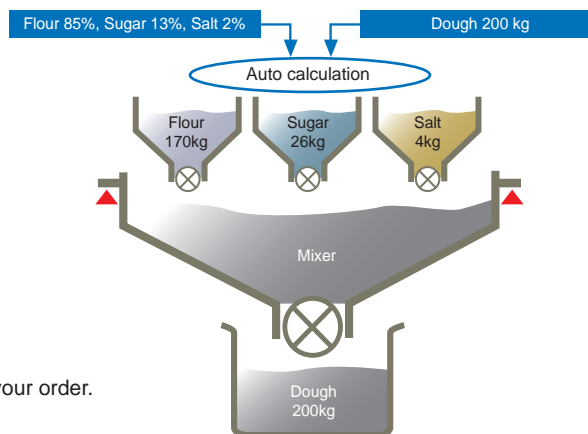

Setting of formula weight

Setting of formula weight can be done in 2 ways which is weight setting and ratio (percentage) setting. In ratio setting, the second raw material onwards is automatically adjusted based on the weighing results of the first raw material.

● When directly setting each raw material weight

● When each raw material ratio is consistent

* Please specify requirement for CE marking certified product when making your order.

* CC-Link and DeviceNet interface are not available.
